

Style Check List

1. Fit, Fit, Fit is foremost!

Timeless pieces, quality items, this is where it's more reasonable to spend. Proportion, and length are considered here as well. Find what flatters you. Build your wardrobe on what are classics to you that stand up to time.

2. Flare, Style, Color

There may be more trend in this category, don't spend so much here. Experiment with color, patterns, various looks and see and sense what works.

3. Edit, Style

Put together and take away. A great look is achieved by that final edit. Always do one more glance and see if you are set.

Fashion fades. Only style remains the same.
